

PC CADDIE.id - Anschluss/Connexion

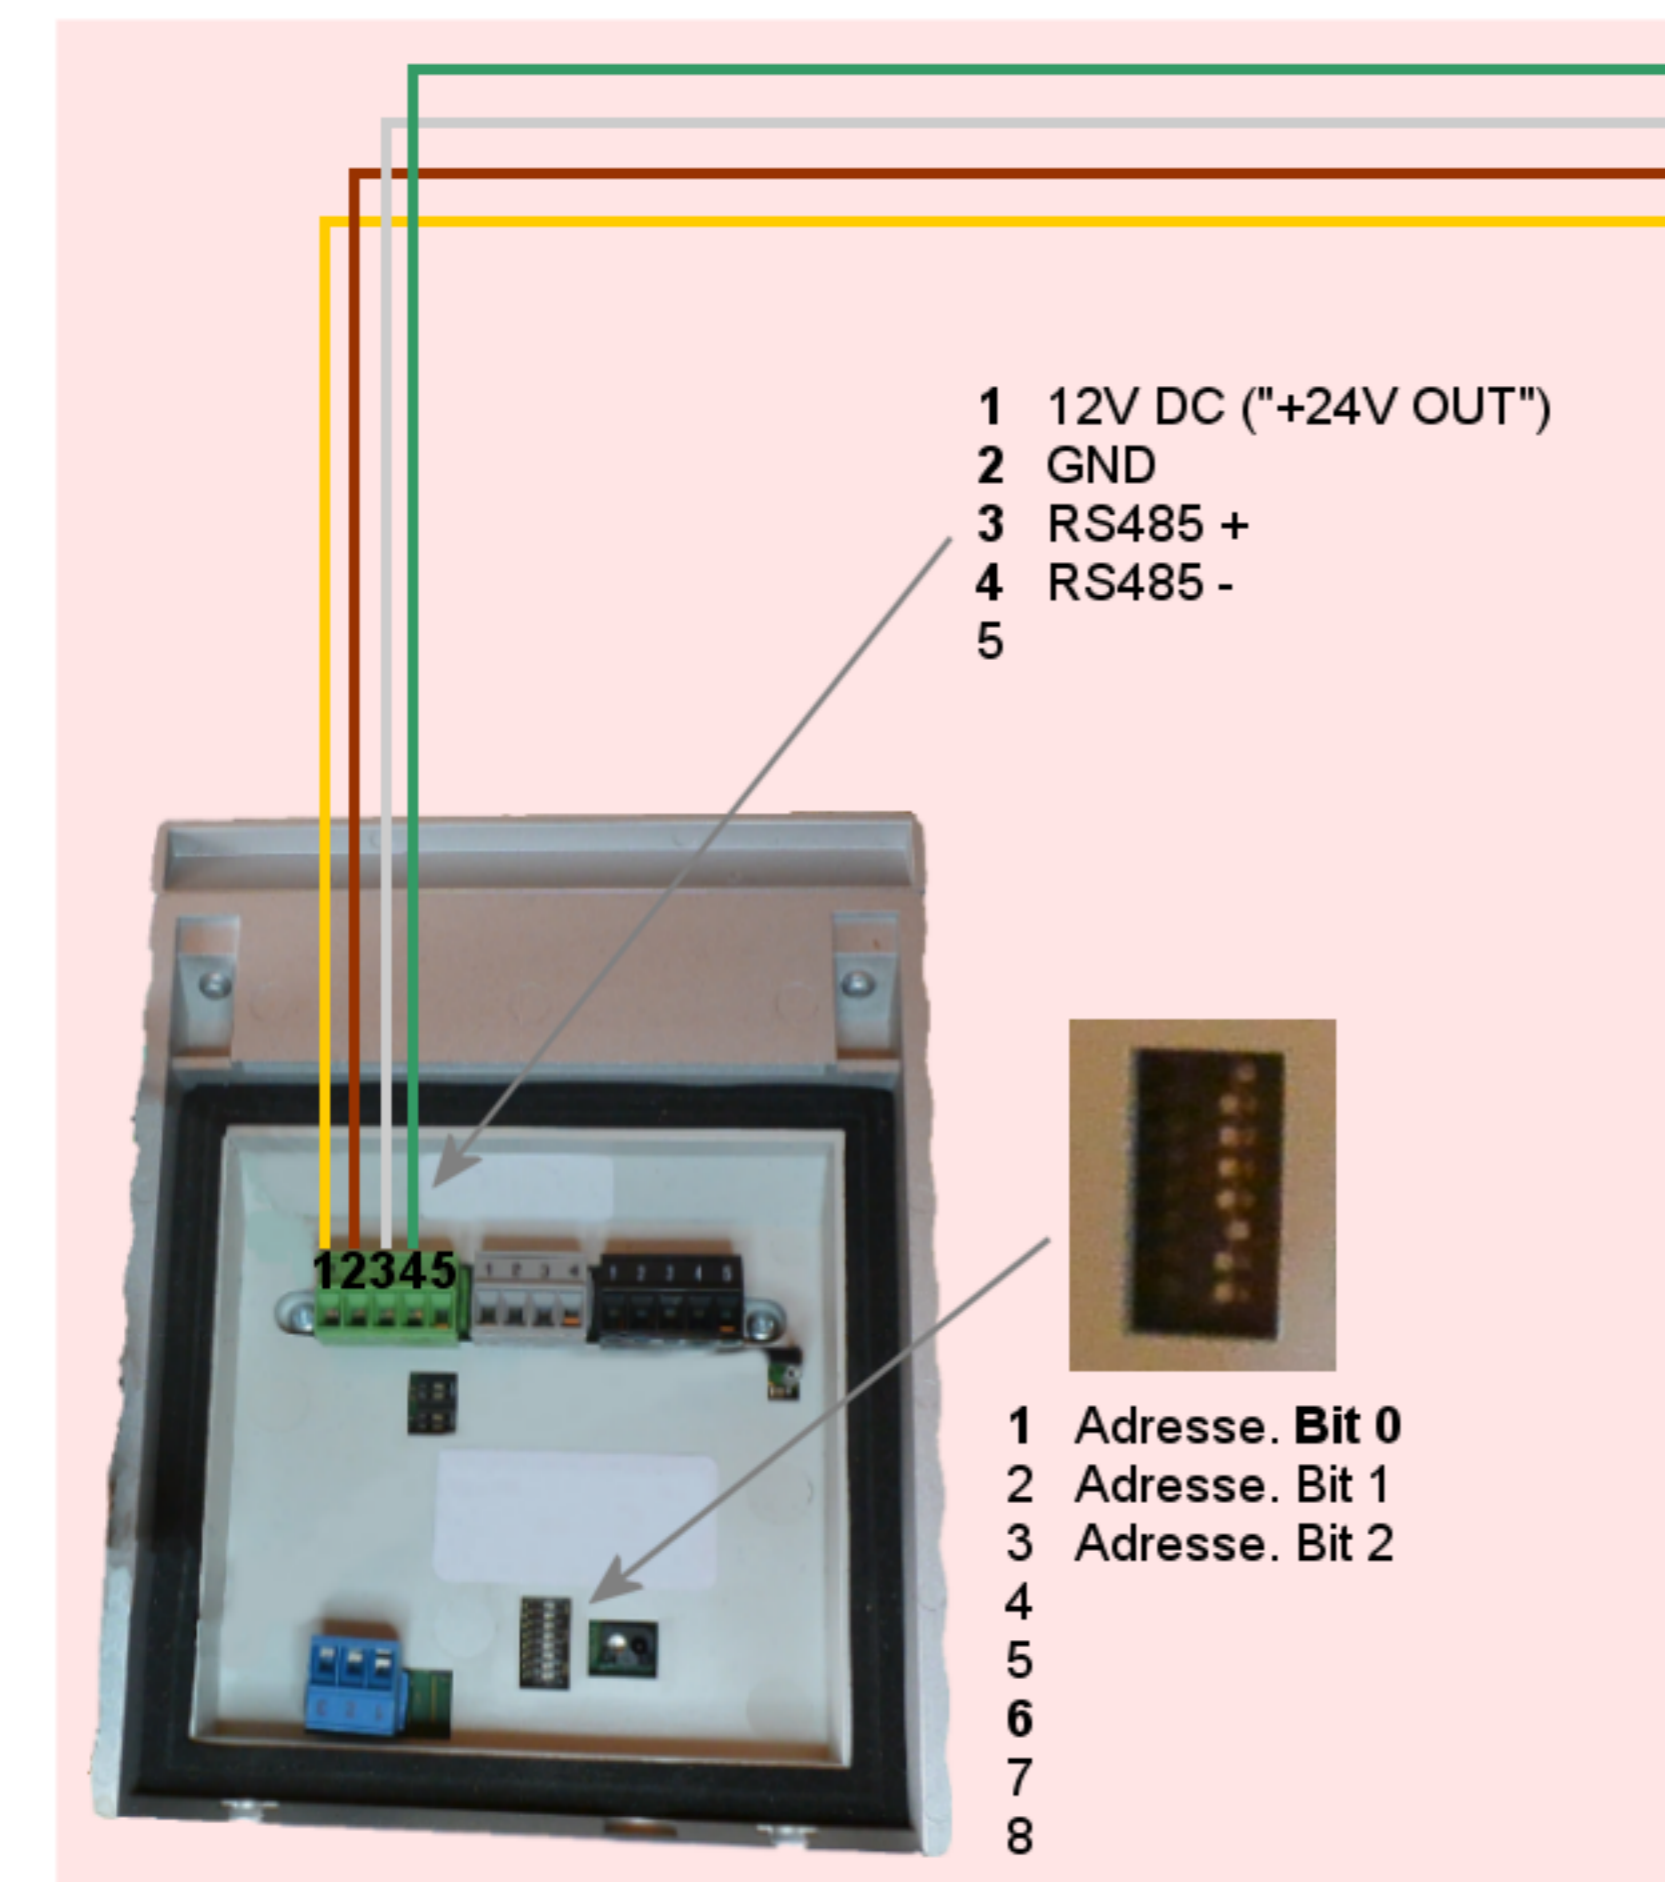

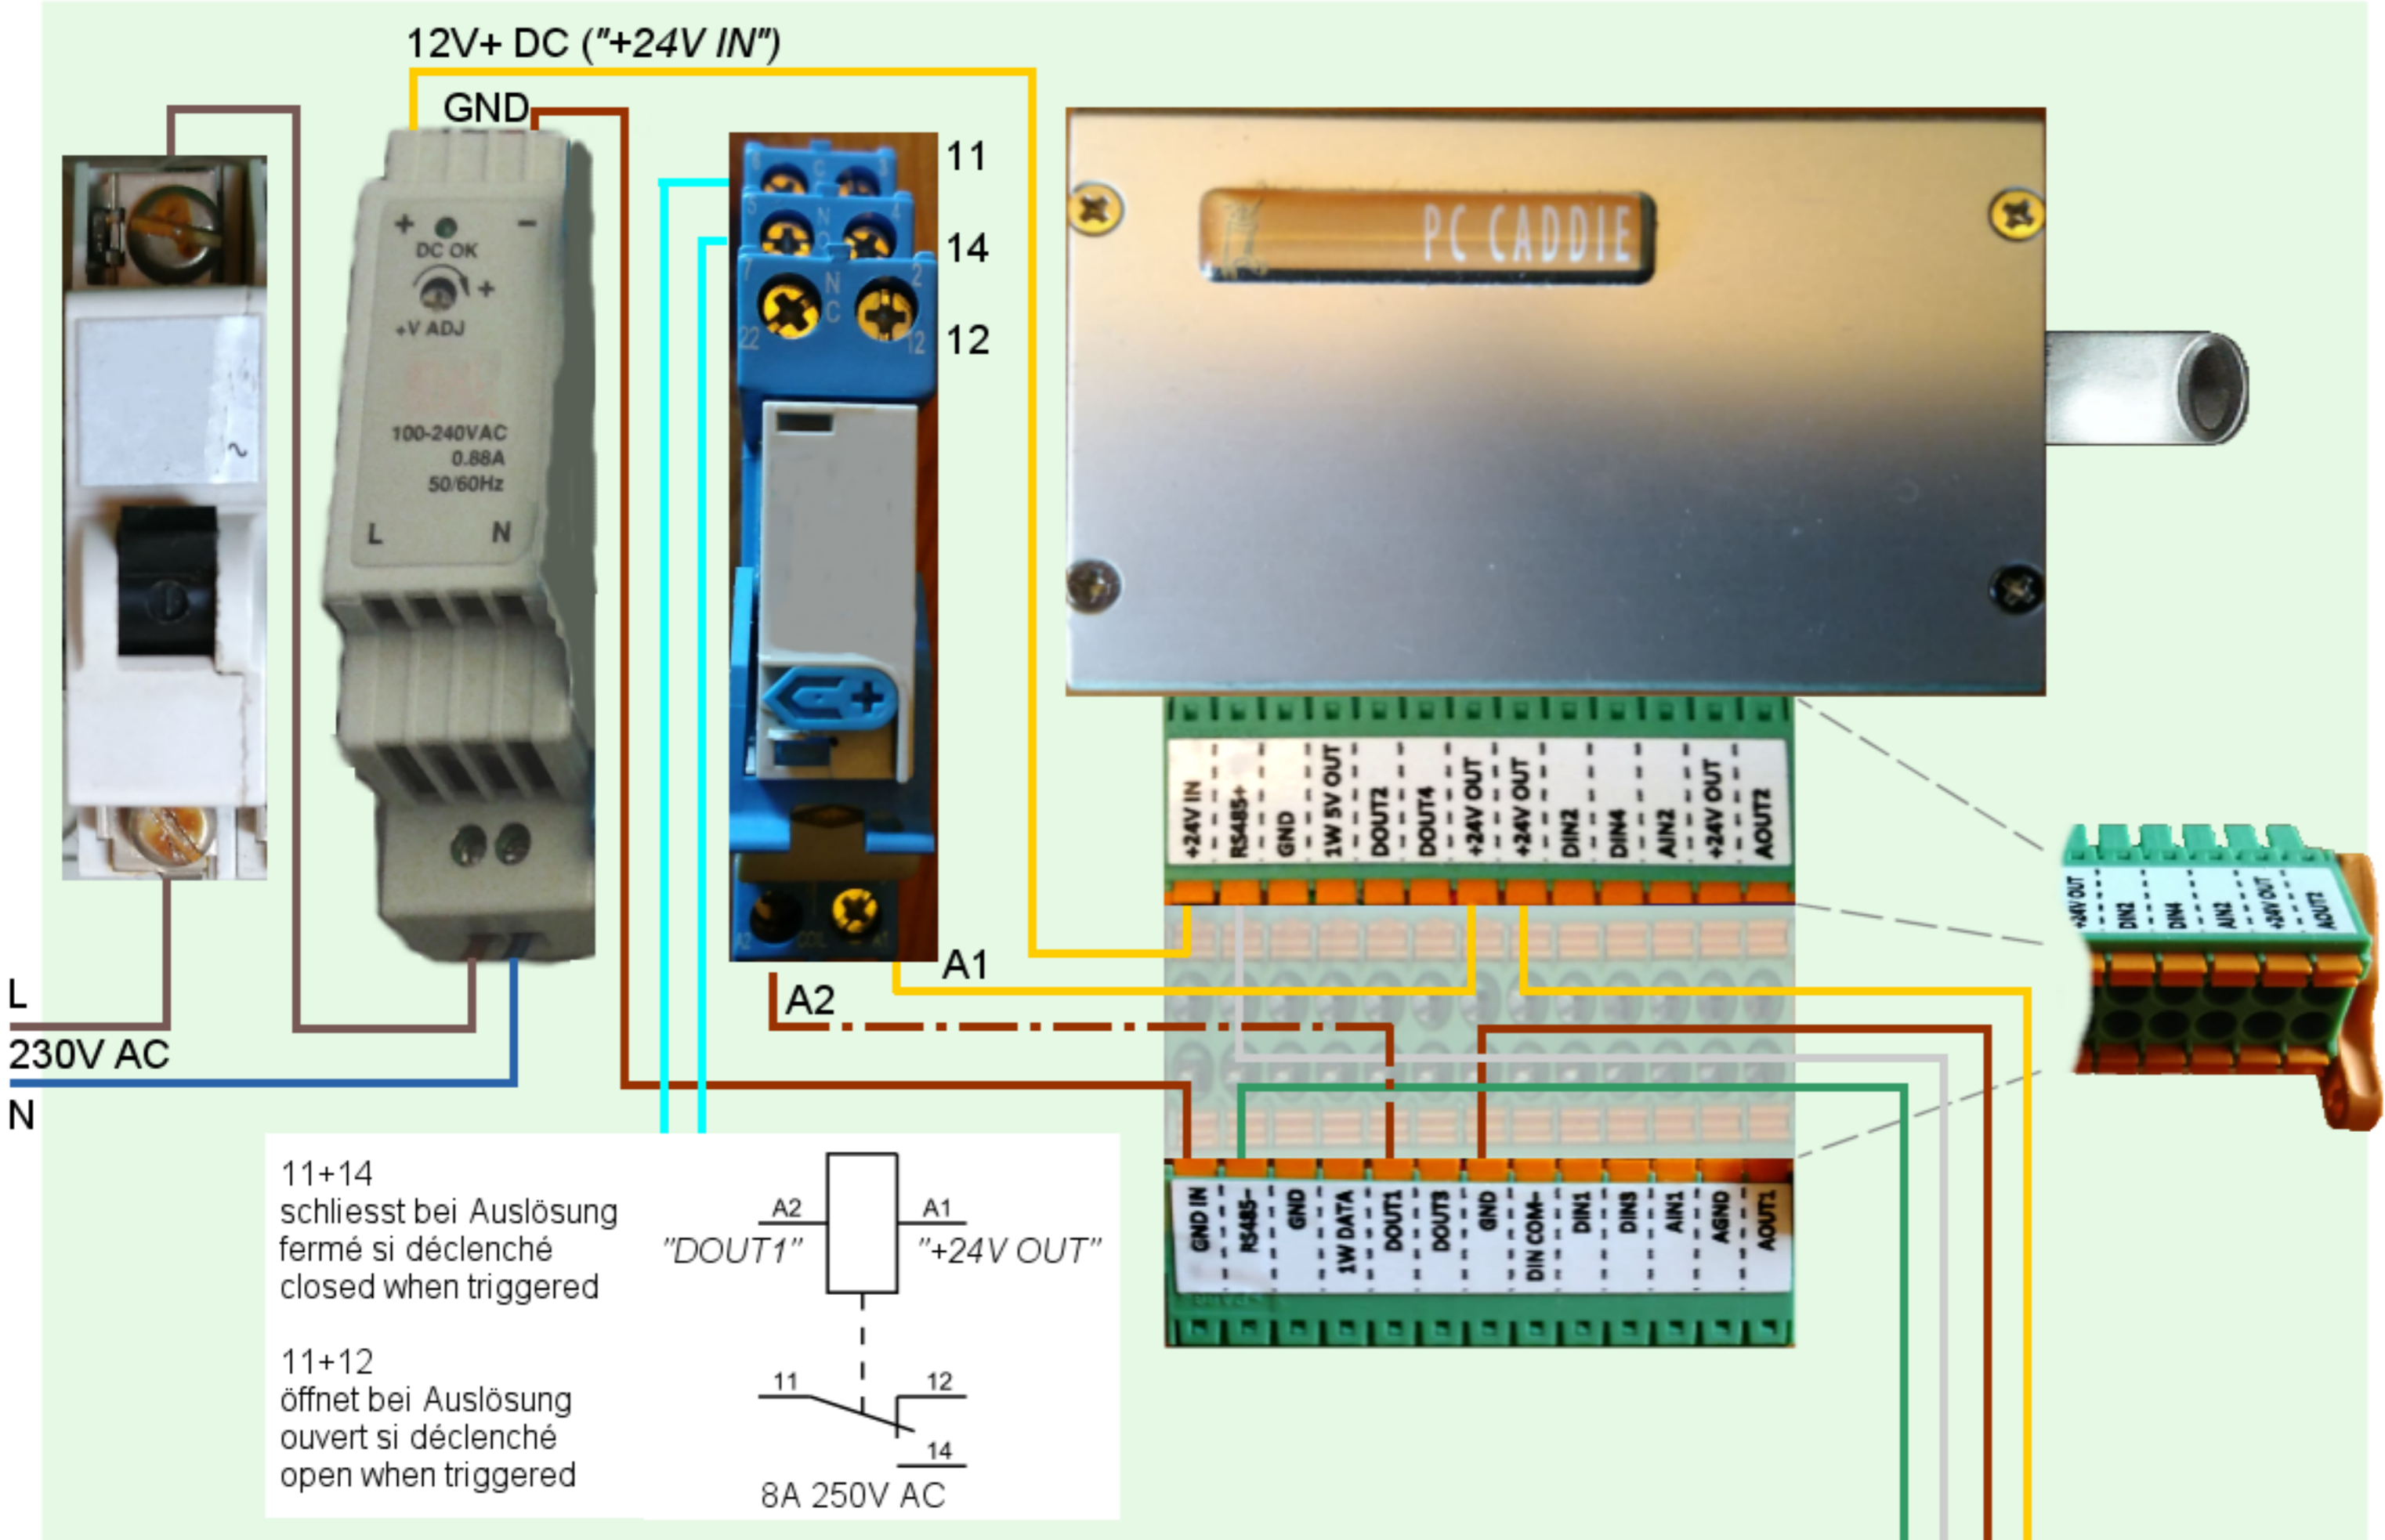

Der Transformator liefert 12V Gleichstrom. Das bedeutet, dass überall wo "+24V" steht tatsächlich +12V anliegen!

Le transformateur fournit 12V courant continue. Cela signifie que partout où est indiqué "+24V" le voltage réel est +12V!

The transformer supplies 12V direct current (DC). This implies that wherever is marked "+24V" the real voltage is +12!
